HISTORY

CUREGATE INTERNATIONAL began as a small research unit in the Zambian local community set up offering voluntary home based care services in the year 2012. The team of health care givers comprised youths school leavers, women that had knowledge in counseling patients and administering prescribed medicines and retired medical practitioners at first the number was 10 people as needs arise for expansion of services the team quickly grew to 30 people these community volunteers were coordinated by government run hospitals and private clinics. They operated in zones and they operated in groups of 5 and sometimes in pairs, the aim was supplement people with compromised immunity, incapacitated pregnant mothers, babies and young children the concept was an outreach program where team members were offered medical kits to disburse medicines to identified patients. We, at the outbreak of the covid 19 participated in the distribution of Orient gene Antibody and Antigen test kits at continental level through our network, which we still stock to keep alert mines, the corporate world and other institutions, of the possible covid spikes.

CONSTRAINTS

The major problem that prevented the smooth running of the program was shortage of prescribed medicines. Drugstores took advantage by offering unaffordable prices of the needed drugs. Especially for the local common people. As it were, mortality rates increased. Pandemics and Epidemics affecting the world were more prominent and most pronounced on the continent and particularly in Sub-Saharan Africa.

MITIGATION

Owing to the background a new generation of qualified entrepreneurs with vigor to drive the country and continent to new a chapter in offering sustainable solutions aimed at reducing the effects of the on board in 2018 with total focus on sourcing medicines and offering health affordable rates this called for sourcing from the right time surely CUREGATE INTERNATIONAL was then born as a business concept to be established throughout Africa to benefit the African peoples labelled with all sorts of acronyms unsynomouse with the new crop of intelligent by 2019 the promoters of CUREGATE INTERNATIONAL found the linkages where sourcing of medicine can be procured there came a manufacturer and partnerships were formed. This manufacture has capacity supply continental needs as single entity hence our claim of continental capacity. We now are established as a standalone entity with sure capacity to satisfy both private, governmental and regional organizational health pharmaceutical and medical equipment needs.

In December 2019, there was a sense of urgency to have CUREGATE INTERNATIONAL incorporated due to the CORONA VIRUS that began in China. The threat of this pandemic was real and the covid-19 death records were

fearsome. It was then when Zambia promoted and the company was established. Due to fresh requirements of international registrations in the field of medicine, official company registrations were only approved in 2022 and work commenced. Curegate is now processing the necessary permits in the partnering African nations but remain sure and steadfast to immediately deliver at any given clientele call.

By the end of 2021 was registered in more than seven countries on the continent major key influential blocks East and west Africa, Central Africa and Southern Africa.

WHY CHOOSE US?

CUREGATE INTERNATIONAL is apparently a fast growing company with continental interest of improving people's life needs we come with costs effective supporting mechanism as we offload quality product and services to all inhabitants.
